

## **OKC's Latching Pneumatic Solenoid Valve**

*OKC Products and other companies have commonly used the ECI valve, a latching pneumatic solenoid, in wellhead controls and in applications where control of a diaphragm operator motor valve is needed.*

*Since ECI is no longer manufacturing this valve, OKC Products has begun manufacturing a valve that is mechanically and functionally similar to the ECI valve. OKC's "LPS Valve" is a direct replacement for the ECI valve and will be available in the fall of 2014.*

*To pre-order and for more information call
