

Solar, Wireless Portable Site Cameras

100% Wireless 100% Solar 100% Web-based

OKC has added the Sensera Systems' MultiSense Surveillance system to our remote well site monitoring and control solution. Based on cellular technology (WiFi is also built in) and fully integrated with solar power, the surveillance system can be deployed in minutes - anywhere. Remote I/O from the site can also be integrated to provide a single, low-cost platform for video monitoring and SCADA functions. Built for harsh environments, the MultiSense cameras also include substantial on-board data storage so data integrity is ensured.
